

Cool Communities Webinar Series: **Urban heat island mitigation: learning from Quebec**

WITH:

Mélissa Giguère

Science Advisor, Biological, Environmental and Occupational Hazards Directorate,
Institut national de santé publique du Québec

&

Gilles Galipeau

Development Advisor, Team Leader
Rosemont-La Petite-Patrie, City of Montréal

Quebec is at the forefront of efforts in Canada to reduce the urban heat island effect. This webinar showcases two initiatives:

Mélissa will provide an overview of urban heat island mitigation efforts implemented under the Quebec Government's 2006-12 Climate Change Action Plan, as well as showcase one of the 37 community-based projects funded under the program.

Mr. Galipeau will discuss the cool roofing regulation implemented by the Montreal Borough of Rosemont-La Petite-Patrie.

Date/time: **Tuesday March 26, 2013 – 1pm to 2.30pm**

Registration: <http://www.surveymonkey.com/s/ccho>

Dial-in details: Dial-in details will be sent to you by email upon registration.

The presentations will be delivered in French. Simultaneous translation is available in English.
